The user can create a template for every form, allowing more efficient use.

This system allows the creation of reports summarizing the forms created, categorized by User, Form, or Customer.

CWF's HSA FormSystem<sup>™</sup> contains over 20 HSA forms that cover all administrative topics related to HSAs.

Features include full retention of the information which is entered.

The system performs compliance checking as you enter the information. On completion you will see a preview of the completed product.

The HSA FormSystem<sup>™</sup> can be run on a single PC, or on any local or wide-area network system.

This system supports every printer that is available through Windows.

An IRA FormSystem<sup>™</sup> is also available.
